

### **Things to consider when planning your bathroom remodeling project:**

1. Are you planning on refreshing a space or doing a full demo?
2. What look do you want? Sleek and modern? Timeless and traditional?  
Do you have any inspiration pictures or a Pinterest board to review?
3. Do you want to keep old vanities or replace with new ones?
4. Do you want to re-install your current toilet or install new one?
5. Do you want new shut-off valves for sinks and toilet installed?
6. Do you want to install porcelain/ceramic tiles or natural stone such as marble/travertine?
7. Do you want to install a built-in niche in your shower? Single or double?  
Should the niche be recessed with ogee?
8. Do you want an accent in your shower? If so, do you want to install pencils around the accent?
9. Do you want corner shelves?
10. Do you want a shower seat? What kind? Solid or suspended?
11. Do you want to install tiles around the tub?
12. Do you want to expand your shower?
13. Do you want to install tiles in the ceiling in your shower?
14. Do you want to install a new tub? Drop-in or freestanding tub?
15. Do you want to install bullnose tiles around the shower or do you want to use schluter trims?
16. And much more...
